

2017/18 & 2018/19 Manitoba Hydro Electric General Rate Application

Green Action Centre Undertaking #41

GAC to review the Northern allowance and if it is believed such a process could be allowed from a legislative point of view, Mr. Chernick will review and provide his view as to how the Northern allowance could be used in rate design.

Response

Mr. Chernick and Green Action Centre do not have the required expertise and knowledge of the details of the Northern Allowance to be able to incorporate the details of the Northern Allowance into a rate design package. Because we do not have sufficient information regarding the Northern Allowance, Mr Chernick and Green Action Centre cannot comment on the legislative requirements as they relate to the Public Utilities Board Act and the Manitoba Hydro Act.
