Industry Experience

Valerie has more than 15 years of experience as a Scheduling, Facilitation and Software Specialist in Oil & Gas, Mining, Infrastructure, Environmental, and General Construction sectors.

She has consulting experience directly related to facilitating planning sessions, building, resource and cost- loaded schedules, building schedule templates, incorporating change management into schedules, and tracking progress on Primavera P6 and MS Project schedules for various industries.

She has also performed critical path analysis and KPI reporting on schedule progress. As a facilitator, she has successfully developed and delivered a broad range of Project Management and Application Software training.

Some of her key Competencies are working with Earned Value Management, Project Management & Leadership, Tilos, Primavera P6 EPPM, Primavera P6 Professional, Microsoft Project, Acumen Fuse, Moodle, and MS Train-the Trainer.

She has worked as an Instructor, Technical writer and facilitator for The Northern Alberta Institute of Technology (NAIT), and Project Scheduler on major projects for a major energy midstream organization.

Qualifications:

University of Alberta
Bachelor of Arts, Edmonton, Canada
