**2017/18 & 2018/19 ELECTRIC GENERAL RATE APPLICATION****Manitoba Hydro Undertaking #32**

**Manitoba Hydro to review their records to see whether Manitoba Hydro has compared the average consumption in electrically heated single detached homes on reserve to electrically heated single detached homes off reserve. And if so, provide the conclusions from that analysis**

**Response:**

Manitoba Hydro does not have a detailed analysis prepared comparing the average consumption of electrically heated single detached homes on reserve to electrically heated single detached homes off reserve. Utilizing information available from the billing system for the 2016/17 fiscal year, the following is the weather adjusted average use for electrically heated residential single detached homes on and off reserve.

	2016/17 Weather Adjusted Average Use (kWh)
Electrically Heated Single Detached on Reserve	31,981
Electrically Heated Single Detached off Reserve	28,267
