

2017/18 & 2018/19 ELECTRIC GENERAL RATE APPLICATION**Manitoba Hydro Undertaking #59**

Manitoba Hydro to provide confirmation that the road costs that are attributable to Conawapa are not included in the \$380 million that Manitoba Hydro wants to amortize over the thirty (30) years.

Response:

All road costs that would have been attributable to Conawapa after the project was suspended have been transferred to the Bipole III project. Manitoba Hydro is seeking the endorsement of the PUB to defer and amortize \$380 million related to Conapawa costs over 30 years. That sum includes \$150,000 of road costs that were allocated to the Conawapa project prior to project suspension.
