Dr. D. Christle  
Secretary and Executive Director  
Public Utilities Board  
400-330 Portage Avenue  
Winnipeg, Manitoba  
R3C 0C4

Dear Dr. Christle:

**RE: MANITOBA HYDRO  
FIRST NATION ON-RESERVE RESIDENTIAL CUSTOMER CLASS  
ORDER 100/20 COMPLIANCE FILING**

---

On August 12, 2020 the Public Utilities Board of Manitoba ("PUB") issued Order 100/20 with respect to Manitoba Hydro's proposed revised rates for former First Nations On-Reserve Residential ("FNORR") customers and Diesel Zone Residential customers following the Manitoba Court of Appeal Decision issued on June 9, 2020.

In this compliance filing, Manitoba Hydro is providing a schedule (Appendix 1) that confirms the increase applied to other rate classes on account of the 0% rate increase for the former FNORR customers effective June 1, 2018 was 0.10%. In addition, Manitoba Hydro is providing rate schedules (Appendix 2), proof of revenue statements (Appendix 3) and bill impact schedules (Appendix 4) reflective of the following changes as directed by the PUB in Order 100/20:

- Effective September 1, 2020, applying a one-time 0.10% rate decrease to the rates of all customer classes except the Diesel Zone Residential class which represents the incremental increase previously applied to these rates as a result of maintaining the 0% rate increase for the former FNORR customers effective June 1, 2018.
- Migrating the former FNORR customers to the Residential Rate class and charging these customers the Residential rate effective September 1, 2020. As a result of this migration the former FNORR customers will receive a one-time rate increase of approximately 6.5%, equivalent to a bill increase of \$13.88 per month, for the average on-reserve residential customer using 2500 kWh.
- Maintaining the Diesel Zone Residential class rate at the August 1, 2017 approved rates.

The 2020/21 proof of revenue statements indicate the additional revenues forecasted over the balance of the 2020/21 fiscal year (September 1 to March 31), and on an annualized basis. Manitoba Hydro has also included an indicative proof of revenue for the 2018/19 fiscal year based on rates that no longer include the incremental rate increase that was applied to other customer classes on account of the creation of the First Nations on Reserve Residential customer class. The 2018/19 proof of revenue demonstrates that the indicative revenue increases by customer class result in an overall 3.6% revenue increase to Manitoba Hydro, assuming no First Nations on Reserve Residential

class and no increase to Diesel Zone customers, with the exception of the general service grid-related rates.

In order to implement rates for September 1, 2020, Manitoba Hydro respectfully requests the PUB's approval of the enclosed schedules by August 24, 2020. If you have any further questions with respect to this matter, please do not hesitate to contact Brent Czarnecki at 204-360-3257.

Yours truly,

## DEFINITIONS

All Rates Schedules in the publication are applied on a MONTHLY basis except as noted.

The following expressions shall have the following meanings:

- a) “Basic Charge”: a fixed charge that that does not change with the amount of electricity used. This includes the direct costs of metering, portions of the distribution system, as well as billing administration.
- b) “Billing Demand”: The greatest of the following (expressed in kVA)
  - i. measured demand; or
  - ii. % of contract demand; or
  - iii. % of the highest measured demand in the previous 12 months.
- c) “Billing Month”: the period of time, generally 30 days, in which Energy and/or Demand is consumed and thereafter billed to the Customer.
- d) “Demand”: the maximum use of power within a specified period of time.
- e) “Demand Charge”: that portion of the charge for electric service based upon the electric capacity (kVA) consumed and billed on the basis of the billing demand under an applicable rate schedule.
- f) “Energy”: power integrated over time and measured or expressed in kilowatt-hours (kWh).
- g) “Energy Charge”: that portion of the charge for electric service based upon the electric energy (kWh) consumed or billed.
- h) “Kilo-Volt Amperes (kVA)”: also referred to as apparent power, is the product of the volts times current of a circuit divided by 1000. It is composed of both real and reactive power.
- i) “Kilowatt Hour (kWh)”: the basic unit of electric energy equal to one kilowatt of power supplied to or taken from an electric circuit steadily for one hour.
- j) “Measured Demand”: the highest demand recorded in the Billing Month.
- k) “Power Factor”: is the ratio of real power (kW) to apparent power (kVA) for any given load and time. Generally it is expressed as a percentage ratio.
- l) “Watt (W)”: the electrical unit of power or rate of doing work; the rate of energy transfer equivalent to one ampere flowing under a pressure of one volt at unity power factor.

**RESIDENTIAL RATES**

**RESIDENTIAL - TARIFF NO. 2020-01**

Basic Charge:	\$ 8.61
PLUS	
Energy Charge:	
All kWh	@ 8.730 ¢ / kWh
Minimum Bill:	\$ 8.61

Services over 200 amps will have \$8.61 added to the Basic Charge.

**Applicability:**

The Residential rate is applicable for all residential purposes as follows:

- a) individually metered single family dwellings including those in multiple residential projects and single or three phase farm operations served through the same meter if:
  - i. the connected business load does NOT exceed 3 kW; or
  - ii. the combined agricultural and residential load does NOT exceed a demand of 50 kW.
  
- b) services for personal use outside the home, such as residential water wells, private garages, boat houses and swimming pools (use can be for household, recreational and hobby activities).
  
- c) single metered multiple residential projects meeting all the following criteria:
  - i. monthly demand does not exceed 50 kVA;
  - ii. the meter serves four or less individual suites or dwelling units;
  - iii. none of the units are used for business purposes;
  - iv. individual dwelling units are:
    - self-contained rental apartments with common facilities; or
    - row housing with self-contained rental dwelling units and common facilities; or
    - buildings with condominium type dwellings incorporated under *the Condominium Act*; or individual residential services within a trailer park established prior to May 1, 1969.

Accounts where the Monthly Billing Demand is 50 kVA or less within the past 12-month period, ALL energy in excess of 11,000 kWh will be charged @ 6.656 ¢ / kWh.

Primary metering of multiple Utility-Owned transformation services has an additional 2% added to the kVA for each transformation greater than one. There is also a 1% reduction on recorded demand and energy to account for transformer losses.

Applicability:

The General Service Small Rate is applicable to:

- a) service with Utility-Owned transformation for all non-residential purposes including churches, community clubs and other community service and recreation facilities and all commercial and general purposes wherein the conduct of business activities or operation is associated with the distribution of goods and/or services.
- b) occupied dwellings where the connected business load exceeds 3 kW to not exceeding 200 kW.
- c) single metered multiple residential projects meeting any of the following criteria:
  - i. monthly demand exceeds 50 kVA to not exceeding 200 kVA ; or
  - ii. the meter serves five or more individual suites or dwelling units; or
  - iii. any of the units are used for business purposes.
- d) farm services:
  - i. without an occupied dwelling being used for agricultural or commercial purposes; or
  - ii. where the connected business load exceeds 3 kW to not exceeding 200 kW; or
  - iii. where the combined agricultural and residential load exceeds a demand of 50 kVA to not exceeding 200 kVA.

## **GENERAL SERVICE**

### **SHORT-TERM POWER RATE**

The General Service Short-Term application is available throughout the Province of Manitoba except in the Diesel Zone, for customers with services exceeding 200 kVA who, by the nature of their business, do not require service during the months of December, January, and February. Qualifying customers will be billed at, and subject to the conditions of, the appropriate General Service Medium or Large rate.

Services must be disconnected from 00:00 hours, December 1 to 24:00 hours, February 28/29. Customers may use up to a maximum of 1,000 kWh during these months for security purposes only (i.e. alarm system, security lighting) but must notify Manitoba Hydro each year in advance of their operation shutdown.

Service must be taken for a minimum of four months, normally consecutively, during the period March 1 to November 30. Customers will be subject to the same 25% ratchet provisions as applicable to General Service Medium and Large customers, with the exception that no ratchets will apply for the months of December, January or February unless the customer exceeds the 1,000 kWh per month allowable use during those months.

General Service Short-Term is NOT available in conjunction with other services at the same point of delivery.

### **UNMETERED SERVICES**

#### **Billed on the General Service Small Rate Tariff No. 2020-20 or 2020-21:**

The Unmetered Service rate is applicable:

- a) for non-residential customers where the load is constant and the consumption is consistent and metering is unnecessary or undesirable, specifically including traffic signals, pedestrian walkway lighting, directional traffic signs, hazard flashers, cable television power amplifiers, telephone booths, transit shelters (both heated and unheated), cathodic protection rectifiers (for oil and natural gas pipelines), water gauge wells, highway traffic counters, governmental navigational lights (both nautical and aerial), municipal sirens and Canadian Emergency Measures Organization emergency siren alarms.
- b) for existing railway crossings, sign lighting and window lighting. Customers will be required to provide metering facilities if additional load is connected.
- c) for services such as fairs, summer midways, television production and welding schools where service is required for less than 30 days.
- d) for oil field pumping services connected prior to April 1, 1980 with oil pumping motors of the counter balanced (nodding or piston) type.

## GENERAL SERVICE

### SHORT-DURATION, INTERMITTENT RATE

#### TERMS AND CONDITIONS

##### General

Manitoba Hydro will supply short-duration, intermittent power and energy to customers whose operation requires short periods of high demand combined with overall, very low energy consumption.

The Corporation may regulate timing of the customer's demand requirements so that they do not coincide with other system peak demands.

The Corporation may interrupt the supply at any time, for any length of time and for any reason.

##### Conditions of Service

Qualifying customers will be billed at, and subject to the conditions of, the appropriate General Service Large or Medium rate with the following provisions:

- a) Measured demand will be reduced by 50% for billing purposes.
- b) Customers will be assessed a monthly energy entitlement based on a 1% load factor (monthly demand x 0.01 x 730) to be billed at the applicable General Service rate.
- c) Energy consumption in excess of the monthly energy entitlement will be billed at a rate equal to 10 times the usual applicable General Service rate.

Customers will be required to enter into a formal contract with Manitoba Hydro. The contract will document the above conditions as well as any others considered necessary due to the nature of a specific service.

##### Rate Application

The General Service Short-Term, Intermittent rate is available to all customers, except those in the Diesel Rate Zone, to customers qualifying for the General Service Large and General Service Medium rates.
