

**Undertaking (Transcript pages 7675)**

THE CHAIRPERSON: Dr. Grant stole my question, so I'm going to ask if you could canvass your members and ask them what the percentage of their total costs for electricity are, and send it to the Board, and then we will advise all the parties.

**Response:**

With respect to the above request, Ms. McLandress canvassed the members of the Mining Association of Manitoba. Providing individual electricity costs as a percentage of total costs would be considered confidential information, however for the operating mines in Manitoba electricity costs range from approximately 10% to 15% on an annual cash cost basis for the large northern operations, lower for the smaller southern operators.
