2019 GENERAL RATE APPLICATION  
Undertaking #15 Transcript Page 783

---

**Undertaking #15**

MPI to provide the increase in revenue associated from the higher DSR demerit premiums in dollars, through Q2 of the current fiscal year, i.e., show what the revenue would've been if MPI didn't change the scale, and then what the actual revenue turned out to be. The difference would be the effect on the new rates.

**RESPONSE:**

The increase in revenue associated from the higher DSR demerit premiums is approximate \$8.4 million through Q2 of the current fiscal year. The estimated annualized impact is \$16.8 million, which is in line with what MPI presented in the 2018 GRA Figure REV 34 (\$17.5 million).
