## Undertaking 16 (Transcript, January 15, 2020, page 2026)

Mr. Harper to provide the table showing the allocated percentages and allocated dollars of enabling strategies and corporate overhead to the electric and gas portfolios by benefits.

## <u>Response</u>

Attached are the original tables provided in the response to PUB/COALITION-20 with the title to Table PUB/COALITION 20-1 C corrected per Transcript page 2026 along with the requested table. In preparing the response Mr. Harper noted there was a typo in footnote 137 of this evidence – the NPV benefit for gas portfolio is \$59.07 M not \$57.07 M. However, the correct value was used in the calculation the 89.4%/10.6% split between the electric and gas portfolios quoted in Mr. Harper's Evidence (page 47).
