CMMG (MPI) 2-1

Part and Chapter:		Page No.:	
PUB Approved Issue No:	13		
Topic:	Driver Safety Rating (DSR), including but not limited to MPI's progress towards changes to the DSR system;		
Sub Topic:			

Preamble to IR:**Question:**

- a) Please provide the number of Manitoba licenses with each of the negative safety ratings from (-20) – (0)
- b) For each negative safety rating from (-20) to (0) please provide the number of Manitoba licenses who do not have a vehicle registered under their name.
- c) For each positive safety rating from (+1) to (+15) please provide the number of Manitoba licenses who have more than one vehicle registered under their name.
- d) Please provide a calculation demonstrating the amount of additional revenue MPI would accrue if each individual who has more than one vehicle registered under their name, paid premiums based on the Base (0) amount, for each additional vehicle.

Rationale for Question:

To evaluate the current DSR system,

RESPONSE:

- a) *Figure 1* below provides the number of active and non-active Manitoba licenses with driver safety ratings (DSR) between -20 to 0 as at August 1, 2020. While not negative, the 0 DSR level is also included.

PUB Approved Issue No:	13		
Topic:	Driver Safety Rating (DSR), including but not limited to MPI's progress towards changes to the DSR system;		
Sub Topic:			

Preamble to IR:**Question:**

- a) Please provide the total number and value for all PIPP claims across all vehicle classes for the last 5 years.
- b) Please provide the total number and value for all PIPP claims from individuals without a vehicle registered in their name for the last 5 years.
- c) Please provide the number and value for all PIPP claims from un-licensed, non-vehicle owners for the last 5 years.
- d) Please provide the DSR ratings for all drivers without a vehicle registered in their name who incurred a PIPP claim in the last 5 years.

Rationale for Question:

To evaluate the efficacy of the current DSR system.

RESPONSE:

- a) Please see *Figure 1* below indicating the total PIPP claim count and reported amount for the last 5 years, as of September 1, 2020.

The Claim Count for *Figures 1, 2, and 3* below excludes zero dollar (\$0) claims, and is on an accident year basis.

Figure 1 PIPP Claim Count and Reported

Line No.	Accident Year	Claim Count	Reported Amount
1	2015	11,882	181,125,860
2	2016	11,982	197,771,727
3	2017	12,042	187,337,359
4	2018	11,361	146,900,655
5	2019	10,359	94,439,534

- b) Please see *Figure 2* below indicating the PIPP claim count and reported amount for claimants who did not have a vehicle registered to them in the last 5 years. These figures are for claimants who were MPI customers at the time of their respective losses. These claimants have an Autopac Online (AOL) customer number that MPI used to determine if the claimant had a vehicle registered to them in the last 5 years. For completeness, Figure 2 also presents the PIPP claim count and reported amount for claimants who did not have an AOL customer number at the time of loss, and for claimants who had a vehicle registered to them in the last 5 years.

- c) Please see *Figure 3* below indicating the PIPP claim count and reported amount for claimants who did not have a driver's license at the time of loss and did not have a vehicle registered to them in the last 5 years. Similar to the response to part (b) above, these figures represent claimants who were MPI customers at the time of their respective losses.

Topic:	Driver Safety Rating (DSR), including but not limited to MPI's progress towards changes to the DSR system;		
Sub Topic:			

Preamble to IR:**Question:**

- a) What are the total number and value of all claims for the past 5 years?
- b) What are the total number and value of all claims for drivers without a registered vehicle for the last 5 years?
- c) Please provide the DSR rating for all drivers without a registered vehicle who were involved in a collision in each of the last 5 years.
- d) Please provide the DSR rating for all drivers with a registered vehicle who were involved in a collision in each of the last 5 years.

Rationale for Question:

To assess the claims incurred by drivers with negative DSR ratings

RESPONSE:

- a) Please see *Figure 1* below indicating the total collision claim count and reported amount for the last 5 years, as of February 29, 2020. Corresponding figures for PIPP are provided in CMMG (MPI) 2-2.

The Claim Count for *Figures 1 and 2* below excludes zero dollar (\$0) claims, and is on an accident year basis.

4	2018	12,683	54,088,617
5	2019	12,677	60,364,480

- c) and d) Please see *Figure 3* indicating the driver safety rating (DSR) levels for the drivers at the time of loss. The drivers are separated based on whether or not they have a vehicle registered to them in the last 5 years. The total driver count in *Figure 3* will not match to the total claim count in *Figure 1* since hit-and-run collision claims often do not have an associated driver. There are 110,028 claims which did not have an associated driver.

- d) See *Figure 3* below:

CMMG (MPI) 2-4

Part and Chapter:		Page No.:	
PUB Approved Issue No:	2		
Topic:	Rate Indication		
Sub Topic:	Loss Development Factors		

Preamble to IR:

"Furthermore, PUB Order 176/19, directive 3.3, requires MPI to recognize the differences in loss development between serious losses and other losses."

PUB Order 176/19, directive 3.3

"In respect of Accident Benefits Other Indexed and Weekly Indemnity, the Corporation uses a common set of loss development assumptions in the analysis of Serious vs. Other losses for deriving rate indications for the Private Passenger, Commercial and Public Major Use classes. In its evidence, the Corporation agreed that there are observed differences in loss development patterns between Serious vs. Other losses, with Serious losses typically being slower to emerge, and that the Corporation's analysis approach does not fully recognize these differences."

"While indicating that there may be limitations as to what remedies are possible to address this, due to sparseness of the data, the Corporation undertook to review its current approach in this regard for the 2021 GRA."

Pursuant to PUB Order 176/19 the Corporation was to review the current approach regarding loss development patterns and the differences between Serious vs Other losses for the 2021 GRA. The Corporation has implemented a modification to its methodology by separating 'Serious' losses and 'Non-serious' losses.

Question:

- a) Please provide the requested rate change for all vehicle classes had the formula to separate out serious vs non serious losses not been applied.
- b) Please describe the impact that the separation of serious vs. non serious losses has had on vehicle classes other than the Motorcycle class.

Rationale for Question:

To determine the impact of the methodology change for all vehicle classes.

RESPONSE:

- a) and b)

Please see *Ratemaking Appendix 8*, which summarizes the impact of methodology and assumption changes made to the ratemaking methodology in the 2021 GRA. Per *Ratemaking Figure RM App 8-1*, the impact on the Motorcycle major class of using separate loss development factors for Serious Losses and other than Serious Losses is an increase of 8.7% in the required rate change (i.e. from -1.7% to 7.0%). By comparison, the impact of this change on the Private Passenger major class is a decrease of 0.1% in the required rate change (i.e. from -10.9% to -11.0%).

Part and Chapter:		Page No.:	
PUB Approved Issue No:	8.		
Topic:	Performance of the investment portfolio and the composition of i) the portfolio, ii) benchmark portfolio(s) on a market value basis (e.g. asset mix);		
Sub Topic:			

Preamble to IR:

MPI stated in its response to CMMG (MPI) CI 1-3 that “it does not support the idea of creating a special backing portfolio for motorcycle claims liabilities.”

MPI further noted “The Motorcycle Class has a very large composition of Personal Injury Protection Plan claims that have a very long tail and, as a result, are more impacted by long-term interest rates.”

Question:

- a) Please provide further explanation as to MPI’s rationale as to why it does not support the use of a special backing portfolio for motorcycle claims liabilities.
- b) Please provide the Asset Liability Management Strategy documentation which mandates the preclusion of growth assets in the Basic Claims portfolio.

Rationale for Question:

To assess the Corporations investment portfolio.

RESPONSE:

- a) In its response to CMMG (MPI) CI 1-3 MPI states:

"MPI...will consider making the change in the 2022 GRA, after a more thorough impact assessment is complete for all vehicles".

As the yield curve is extremely flat at the moment, any benefit from implementing a unique portfolio for motorcycle claims liabilities at this time would be minimal.

- b) Page three of the Asset Liability Study - Phase 2 Report by Mercer dated December 19, 2017, states:

"Given MPI's low tolerance for risk, the proposed Policy for Basic will not include equities or alternatives".

CMMG (MPI) 2-6

Part and Chapter:		Page No.:	
PUB Approved Issue No:	2		
Topic:	Rate Indication		
Sub Topic:			

Preamble to IR:

The Corporation has modified their methodology by separating out Serious and Non-Serious losses for the 2021 GRA.

Question:

- a) Please provide the loss triangles for Serious Losses for AB Indexed and Income Replacement Income.
- b) Similarly, please provide both Serious and Non-Serious loss triangles for AB Indexed and Income Replacement Income for Motorcycles, despite the Corporation's position that statistically reliable selections cannot be derived from this information.

Rationale for Question:

In order to determine the appropriateness of the implied serious LDF factors as calculated in PUB (MPI) 1-14.

Rationale for Question:

Copy and paste IR rationale for question from Interveners and PUB here.

RESPONSE:

- a) Please refer to PUB (MPI) 2-10.

- b) Please refer to Appendix 1.

CMMG (MPI) 2-7

Part and Chapter:	Part VI – RM Appendix 9	Page No.:	18
PUB Approved Issue No:	1; 11		
Topic:	Requested vehicle rate and any changes to other fees and discounts; Claims forecasting (including PIPP)		
Sub Topic:			

Preamble to IR:

Table 8 'Pure Premium Trend – PIPP' demonstrates an IRI Indicated Exponential Trend (All Years) of 0.89%, and an Indicated Exponential Trend (Most Recent 10 Years) of -0.23%. The Corporation has selected a Trend of 1.00% for this year's GRA.

Question:

- a) Please provide the Corporations rationale for selecting a 1.00% trend for this year's GRA.
- b) Please provide the Corporations rationale for not using the Indicated Exponential Trend for the most recent 10 years, which shows a negative trend.
- c) Please reproduce Table 8, Pure Premium Trend – PIPP at the above identified reference, excluding the data for the 05/06 year.
- d) Please provide an updated Indicated Rate Change based on the use of a 0% trend factor for the IRI trend.
- e) Please provide an updated Indicated Rate Change based on the use of a -0.23% trend factor for the IRI trend.

- f) Please provide an updated Indicated Rate Change based on the use of a 0.89% trend factor for the IRI trend.

Rationale for Question:

To properly understand MPI's assumptions, and analyze the Corporation's rate forecasting methodologies.

RESPONSE:

- a) and b)

Please refer to *Ratemaking, pages 36 to 38* and *Ratemaking Appendix 9, page 19*, each of which discuss how MPI selects pure premium trends.

- c) Excluding data for the 05/06 year, the 'Indicated Exponential Trend – All Years' for IRI decreases the trend to 0.36% (from 0.89%). Based on the current ratemaking methodology, the Selected Trend for IRI would be 0.50%. The exclusion does not impact the 'Indicated Exponential Trend - Most Recent 10 Years'.

- d), e) and f)

The following figure shows the required rate for each of the major classes assuming a -0.23%, 0.00% and 0.89% pure premium trend for IRI. MPI also includes the 2021 GRA stated required rates per major class for comparison.

Preamble to IR:**Question:**

Please provide the data as provided for CMMG (MPI) 1-3 but over a 10 year period and characterizing each loss as either serious or non-serious.

Rationale for Question:

To assess the methodology change incorporated by the Corporation for serious vs. non-serious losses

RESPONSE:

Please refer to Appendix 1. As is evident from the 102 pages of claims data attached, significant effort went into producing the requested information. MPI fully embraces transparency and openness but nevertheless must comment that it does not believe the value gained from the information provided is equal to the effort involved in complying with the request. MPI reminds the parties that ratepayers' premiums pay for the work involved in answering Information Requests and that the parties should be respectful of their use of ratepayers' premiums when asking their questions.

Preamble to IR:**Question:**

- a) Please provide the per unit claims cost for PPV owned by non-motorcycle owners
- b) Please provide the per unit claims cost for PPV where the owner also has a registered motorcycle.

Rationale for Question:

To evaluate the claims incurred by motorists who also have an insured motorcycle.

RESPONSE:

- a) *Figure 1* below provides the per unit claims cost for Private Passenger Vehicles (PPV) owned by non-motorcycle owners.

Part and Chapter:		Page No.:	
PUB Approved Issue No:	9.		
Topic:	Cost of operations and cost containment measures;		
Sub Topic:	Budget of Road Safety Programs		

Preamble to IR:

MPI offers an 'Advanced Motorcycle Training' course but has acknowledged in previous GRAs that the course lacks interest and has low enrollment numbers.

Question:

- a) Please provide the Corporations position on offering a financial incentive to individuals who complete the Advanced Motorcycle Training Course.
- b) Please provide the financial impact to the Corporation in a circumstance where MPI offered a 10% discount on premiums to motorcyclists who completed the Advance Motorcycle Training Course (taking into consideration the cost of the course).

Rationale for Question:

To examine potential incentives to encourage more motorcycle training, and therefore road safety.

RESPONSE:

- a) MPI has no plans to offer a financial incentive to individuals who complete the Advanced Motorcycle Training Course.

- b) MPI does not offer a discount on vehicle premiums for driver training. Instead, MPI encourages safe driving through the Driver Safety Rating (DSR) system, which recognizes safe driving behaviour by providing a percent discount on vehicle premium and a reduced driver's licence premium based on an individual's driving record.
