**Undertaking #32**

MPI to make an adjustment made to reflect perhaps those U-Drives not returning to pre-COVID levels, and then see how that impacts on the rates that taxicabs will pay.

**RESPONSE:**

The presentation of the rate indications in Ratemaking Chapter Figure RM-13 and Ratemaking Chapter Figure RM-14 will not change. In Revenue Chapter, MPI stated

*"For the Public major class, this adjustment stretches over the next two policy years given that the COVID-19 Pandemic effect remains evident in 2021/22. Given that rental vehicles comprise a significant portion of this major class, MPI does not expect units for this group to return completely to prior levels in 2021/22."*

The rate indications are for 2022/23, by which time MPI expects the units for the Public major class to be back at pre-COVID levels.
