2.0 Board Findings 4

3.0 IT IS THEREFORE ORDERED THAT: 5

1.0 Background

On August 12, 2020, the Board issued Order 100/20 in respect of Manitoba Hydro's proposed revised rates for former First Nations On-Reserve Residential customer class ("FNORR class") customers and Diesel Zone Residential customers following a decision of the Manitoba Court of Appeal issued June 9, 2020.

The Manitoba Court of Appeal decision arose from Manitoba Hydro's appeal of the Board's decision in Order 59/18 to direct the creation of the FNORR class and order that the rates of the FNORR class and the Diesel Zone Residential class be maintained at the August 1, 2017 approved Residential rate ("Directive 6"). To ensure that Manitoba Hydro would collect the 3.6% revenue increase approved by the Board in Order 59/18, other customer classes were charged an additional incremental increase so that Manitoba Hydro would be kept whole.

In its decision of June 9, 2020, the Manitoba Court of Appeal allowed the appeal on the basis that the Board had exceeded its jurisdiction in directing the creation of the FNORR class. By letter dated June 23, 2020, Manitoba Hydro advised the Board that, in response to the Manitoba Court of Appeal decision, Manitoba Hydro planned to eliminate the FNORR class and change the rates currently being paid by former FNORR customers and Diesel Zone Residential customers to the then currently approved Residential class rate.

In Order 100/20, the Board directed that, as a result of the Manitoba Court of Appeal decision, former FNORR customers must be migrated to the Residential class effective September 1, 2020 and charged the new Residential class rate that comes into effect on September 1, 2020. The Board also ordered that, effective September 1, 2020, currently approved rates for all classes except the Diesel Zone Residential class were to be decreased by the amount of the incremental increase that was applied to these rates as a result of maintaining the 0% rate increase for former FNORR customers effective June 1, 2018 (the "FNORR-related Incremental Increase"). With respect to the Diesel Zone Residential customers, and as submitted by Manitoba Hydro, the Board directed that the

Diesel Zone Residential class rate be maintained at the August 1, 2017 approved rate pending further review.

On August 19, 2020, Manitoba Hydro filed with the Board rate schedules and other documentation (“Compliance Filing”) consistent with the direction of the Board in Order 100/20, seeking approval of the rate schedules effective September 1, 2020. The rate schedules developed by Manitoba Hydro include the migration of former FNORR customers to the Residential rate class and for former FNORR customers to be charged the new Residential rate effective September 1, 2020. The rate schedules also provide for a 0.10% rate decrease to the rates of all customer classes except the Diesel Zone Residential class, the rate for which is maintained at the August 1, 2017 approved rate.

Manitoba Hydro also provided in its Compliance Filing a schedule with calculations showing that the FNORR-related Incremental Increase was 0.10% (“Appendix 1”).

2.0 Board Findings

The Board finds the Compliance Filing to be in accordance with Order 100/20.

The Board approves the rate schedules in the Compliance Filing. The Board is satisfied that the rate schedules have been calculated appropriately.

The Board accepts the calculations provided by Manitoba Hydro regarding the FNORR-related Incremental Increase and finds that the FNORR-related Incremental Increase was 0.10%.

3.0 IT IS THEREFORE ORDERED THAT:

1. The Rate Schedules included in Manitoba Hydro's Compliance Filing of August 19, 2020 and attached to this Order **BE AND HEREBY ARE APPROVED** for electricity rates charged effective September 1, 2020.
2. Manitoba Hydro is to notify its customers of the approved customer class rate decreases. Manitoba Hydro is to further notify customers in the former First Nations On-Reserve Residential customer class of the migration to the Residential rate class as a result of the Manitoba Court of Appeal decision and of the rate impact to those customers due to being charged the Residential customer class rate approved by this Order. These customer notifications are to be included in the first bill Manitoba Hydro sends to customer that includes the revised rates. Manitoba Hydro is to file the proposed customer notifications with the Board for approval before delivery to customers.

Board decisions may be appealed in accordance with the provisions of Section 58 of *The Public Utilities Board Act*, or reviewed in accordance with Section 36 of the Board's Rules of Practice and Procedure. The Board's Rules may be viewed on the Board's website at www.pubmanitoba.ca.

DEFINITIONS

All Rates Schedules in the publication are applied on a MONTHLY basis except as noted.

The following expressions shall have the following meanings:

- a) “Basic Charge”: a fixed charge that that does not change with the amount of electricity used. This includes the direct costs of metering, portions of the distribution system, as well as billing administration.
- b) “Billing Demand”: The greatest of the following (expressed in kVA)
 - i. measured demand; or
 - ii. % of contract demand; or
 - iii. % of the highest measured demand in the previous 12 months.
- c) “Billing Month”: the period of time, generally 30 days, in which Energy and/or Demand is consumed and thereafter billed to the Customer.
- d) “Demand”: the maximum use of power within a specified period of time.
- e) “Demand Charge”: that portion of the charge for electric service based upon the electric capacity (kVA) consumed and billed on the basis of the billing demand under an applicable rate schedule.
- f) “Energy”: power integrated over time and measured or expressed in kilowatt-hours (kWh).
- g) “Energy Charge”: that portion of the charge for electric service based upon the electric energy (kWh) consumed or billed.
- h) “Kilo-Volt Amperes (kVA)”: also referred to as apparent power, is the product of the volts times current of a circuit divided by 1000. It is composed of both real and reactive power.
- i) “Kilowatt Hour (kWh)”: the basic unit of electric energy equal to one kilowatt of power supplied to or taken from an electric circuit steadily for one hour.
- j) “Measured Demand”: the highest demand recorded in the Billing Month.
- k) “Power Factor”: is the ratio of real power (kW) to apparent power (kVA) for any given load and time. Generally it is expressed as a percentage ratio.
- l) “Watt (W)”: the electrical unit of power or rate of doing work; the rate of energy transfer equivalent to one ampere flowing under a pressure of one volt at unity power factor.

RESIDENTIAL RATES

RESIDENTIAL - TARIFF NO. 2020-01

Basic Charge:	\$ 8.61
PLUS	
Energy Charge:	
All kWh	@ 8.730 ¢ / kWh
Minimum Bill:	\$ 8.61

Services over 200 amps will have \$8.61 added to the Basic Charge.

Applicability:

The Residential rate is applicable for all residential purposes as follows:

- a) individually metered single family dwellings including those in multiple residential projects and single or three phase farm operations served through the same meter if:
 - i. the connected business load does NOT exceed 3 kW; or
 - ii. the combined agricultural and residential load does NOT exceed a demand of 50 kW.

- b) services for personal use outside the home, such as residential water wells, private garages, boat houses and swimming pools (use can be for household, recreational and hobby activities).

- c) single metered multiple residential projects meeting all the following criteria:
 - i. monthly demand does not exceed 50 kVA;
 - ii. the meter serves four or less individual suites or dwelling units;
 - iii. none of the units are used for business purposes;
 - iv. individual dwelling units are:
 - self-contained rental apartments with common facilities; or
 - row housing with self-contained rental dwelling units and common facilities; or
 - buildings with condominium type dwellings incorporated under *the Condominium Act*; or individual residential services within a trailer park established prior to May 1, 1969.

RESIDENTIAL RATES

SEASONAL - TARIFF NO. 2020-02

Annual Basic Charge:	\$ 103.32
PLUS	
Energy Charge:	
All kWh	@ 8.730 ¢ / kWh
Minimum Annual Bill:	\$ 103.32

The account is billed twice a year, April and October, each for a six-month period. The April billing is for the Annual Basic Charge plus past winter season's consumption. The October billing is for the summer season's consumption only.

Applicability:

The Seasonal rate is applicable to customers outside of the Winnipeg area using less than 7,500 kWh per season and is for residential purposes on an individually metered service when usage is of a casual or intermittent nature.

DIESEL - TARIFF NO. 2020-03

Basic Charge:	\$ 8.08
PLUS	
Energy Charge:	
All kWh	@ 8.196 ¢ / kWh
Minimum Bill:	\$ 8.08

Applicability:

The Residential rate applies to all residential services in the Diesel Communities, provided the service capacity does not exceed 60 A, 120/240 V, single phase.

	PLUS
Demand Charge:	
First 50 kVA of Monthly Billing Demand	No Charge
Balance of Billing Demand	@ \$ 10.77 / kVA
Minimum Bill:	
Demand Charge PLUS Basic Charge	

SMALL THREE PHASE - TARIFF NO. 2020-21

Basic Charge:	\$ 31.55
PLUS	
Energy Charge:	
First 11,000 kWh	@ 9.002 ¢ / kWh
Next 8,500 kWh	@ 6.656 ¢ / kWh
Balance of kWh	@ 4.206 ¢ / kWh
	PLUS
Demand Charge:	
First 50 kVA of Monthly Billing Demand	No Charge
Balance of Billing Demand	@ \$ 10.77 / kVA
Minimum Bill:	
Demand Charge PLUS Basic Charge	

Accounts where the Monthly Billing Demand is 50 kVA or less within the past 12-month period, ALL energy in excess of 11,000 kWh will be charged @ 6.656 ¢ / kWh.

Primary metering of multiple Utility-Owned transformation services has an additional 2% added to the kVA for each transformation greater than one. There is also a 1% reduction on recorded demand and energy to account for transformer losses.

Applicability:

The General Service Small Rate is applicable to:

- a) service with Utility-Owned transformation for all non-residential purposes including churches, community clubs and other community service and recreation facilities and all commercial and general purposes wherein the conduct of business activities or operation is associated with the distribution of goods and/or services.
- b) occupied dwellings where the connected business load exceeds 3 kW to not exceeding 200 kW.
- c) single metered multiple residential projects meeting any of the following criteria:
 - i. monthly demand exceeds 50 kVA to not exceeding 200 kVA ; or
 - ii. the meter serves five or more individual suites or dwelling units; or
 - iii. any of the units are used for business purposes.
- d) farm services:
 - i. without an occupied dwelling being used for agricultural or commercial purposes; or
 - ii. where the connected business load exceeds 3 kW to not exceeding 200 kW; or
 - iii. where the combined agricultural and residential load exceeds a demand of 50 kVA to not exceeding 200 kVA.

Balance of Billing Demand	@ \$ 10.77 / kVA
Minimum Bill:	
Demand Charge PLUS Basic Charge	

Monthly Billing Demand *

The greatest of the following (expressed in kVA):

- a) measured demand; or
- b) 25 % of contract demand; or
- c) 25% of the highest measured demand in the previous 12 months.

Primary metering of multiple Utility-Owned transformation services has an additional 2% added to the kVA for each transformation greater than one. There is also a 1% reduction on recorded demand and energy to account for transformer losses.

Applicability:

The General Service Medium rate is applicable to services where the registered demand exceeds 200 kVA and where the transformation is provided by the Corporation.

Customers who, by nature of their business, do not require service during the months of December, January, and February may qualify for the General Service Short-Term Power rate. For further details see page 17.

GENERAL SERVICE

SHORT-TERM POWER RATE

The General Service Short-Term application is available throughout the Province of Manitoba except in the Diesel Zone, for customers with services exceeding 200 kVA who, by the nature of their business, do not require service during the months of December, January, and February. Qualifying customers will be billed at, and subject to the conditions of, the appropriate General Service Medium or Large rate.

Services must be disconnected from 00:00 hours, December 1 to 24:00 hours, February 28/29. Customers may use up to a maximum of 1,000 kWh during these months for security purposes only (i.e. alarm system, security lighting) but must notify Manitoba Hydro each year in advance of their operation shutdown.

Service must be taken for a minimum of four months, normally consecutively, during the period March 1 to November 30. Customers will be subject to the same 25% ratchet provisions as applicable to General Service Medium and Large customers, with the exception that no ratchets will apply for the months of December, January or February unless the customer exceeds the 1,000 kWh per month allowable use during those months.

General Service Short-Term is NOT available in conjunction with other services at the same point of delivery.

UNMETERED SERVICES

Billed on the General Service Small Rate Tariff No. 2020-20 or 2020-21:

The Unmetered Service rate is applicable:

- a) for non-residential customers where the load is constant and the consumption is consistent and metering is unnecessary or undesirable, specifically including traffic signals, pedestrian walkway lighting, directional traffic signs, hazard flashers, cable television power amplifiers, telephone booths, transit shelters (both heated and unheated), cathodic protection rectifiers (for oil and natural gas pipelines), water gauge wells, highway traffic counters, governmental navigational lights (both nautical and aerial), municipal sirens and Canadian Emergency Measures Organization emergency siren alarms.
- b) for existing railway crossings, sign lighting and window lighting. Customers will be required to provide metering facilities if additional load is connected.
- c) for services such as fairs, summer midways, television production and welding schools where service is required for less than 30 days.
- d) for oil field pumping services connected prior to April 1, 1980 with oil pumping motors of the counter balanced (nodding or piston) type.

GENERAL SERVICE

SHORT-DURATION, INTERMITTENT RATE

TERMS AND CONDITIONS

General

Manitoba Hydro will supply short-duration, intermittent power and energy to customers whose operation requires short periods of high demand combined with overall, very low energy consumption.

The Corporation may regulate timing of the customer's demand requirements so that they do not coincide with other system peak demands.

The Corporation may interrupt the supply at any time, for any length of time and for any reason.

Conditions of Service

Qualifying customers will be billed at, and subject to the conditions of, the appropriate General Service Large or Medium rate with the following provisions:

- a) Measured demand will be reduced by 50% for billing purposes.
- b) Customers will be assessed a monthly energy entitlement based on a 1% load factor (monthly demand x 0.01 x 730) to be billed at the applicable General Service rate.
- c) Energy consumption in excess of the monthly energy entitlement will be billed at a rate equal to 10 times the usual applicable General Service rate.

Customers will be required to enter into a formal contract with Manitoba Hydro. The contract will document the above conditions as well as any others considered necessary due to the nature of a specific service.

Rate Application

The General Service Short-Term, Intermittent rate is available to all customers, except those in the Diesel Rate Zone, to customers qualifying for the General Service Large and General Service Medium rates.

Applicability:

The Seasonal Area and Roadway Lighting rate is available only outside the City of Winnipeg and is applicable for area and roadway lighting installed by agreement for Municipal Corporation, local government districts, Provincial and Federal Governments.

Lighting will be energized from May 1 to October 31 of each year and will be disconnected from November 1 to April 30.

AREA AND ROADWAY LIGHTING

SENTINEL LIGHTING RATE - *TARIFF NO. 2020-83*:

Watts	Rate Per Month	
	Flat Rate (Energy and Rental)	Metered (Rental Only)
100 HPS	\$ 11.57	\$ 7.97
150 HPS	\$ 15.32	\$ 10.89
175 MV	\$ 11.94	\$ 7.97
400 MV	\$ 19.76	\$ 10.89
60 LED	\$ 10.13	\$ 7.97
90 LED	\$ 13.34	\$ 10.98

Applicability:

Sentinel lighting is available for security lighting of private or public areas on a dusk-to-dawn basis throughout the Province of Manitoba. Rental units are intended for continuous year-round service and are not provided on a temporary basis.

Sentinel lighting is available for rental as follows:

- a) on a flat rate basis when connected directly to the Manitoba Hydro distribution system; or
- b) exclusive of electricity if connected to the customer's metered circuits.

AREA AND ROADWAY LIGHTING

DECORATIVE LIGHTING - *TARIFF NO. 2020-85*

Connected load @ \$1.030/kW per night of scheduled use:

Minimum Monthly Bill: \$ 21.04

Applicability:

The Decorative Lighting rate is applicable for new and existing unmetered municipally-owned decorative lights on frames or modules mounted on roadway lighting poles or ornamental standards and/or Christmas trees. The customer is required to advise the Corporation prior to any change in the nights contracted for operation and/or the connected lighting kilowatts.
